

MARTY SCOTT

(they/them)

Brooklyn, NY | 909.456.0467 | greatmartyscott@gmail.com
marty64.net | github.com/martychouette | martychouette.itch.io

A computer scientist and game designer who treats code as creative material. I build interactive systems that explore what code can express - sightless platformers navigated by sound, autobiographical physics games, and an aesthetic-first game engine from scratch. I develop open pedagogical frameworks for teaching code to non-programmers through making, with accessibility and craft at the center of everything I teach.

SKILLS

Pedagogy: Curriculum design, scaffolded instruction, studio-based teaching, accessibility-centered design

Languages: C#, C++, Python, JavaScript, Java, SQL

Engines / Tools: Unity, Unreal, GameMaker, p5.js, Processing

Game Design: Rapid prototyping, play-testing, iterative design, system balancing

Audio: FMOD, Pro Tools, Logic, Ableton (15+ years)

TEACHING EXPERIENCE

NYU Game Center (Tisch) - Code Help Desk | 2025 - Present

- Help BFA and MFA students with code issues across Unity, Unreal, Processing, Twine, and GameMaker
- Walk students through technical problems in plain language so they can get back to making
- Document recurring fixes for the desk

NYU Game Center Conference - Speaker | 2025

- Presented on game design pedagogy and accessibility

Music & Arts - Music Teacher | 2012 - 2018

- Taught piano, guitar, and sound production across age groups and skill levels
- Six years of one-on-one and small group instruction

PEDAGOGICAL WORK

VG101 Knowledge Base | marty64.net/kb | In Development

- Open pedagogical text for teaching videogame design as its own medium, built on a Gesture + Aesthetic Heritage framework
- Core pages: "Code as Material" (Schon, Papert, Sennett), "Debugging as Literacy," "Accessibility as Craft"
- Teaching cycle: Play - Name - Make - Reflect, grounded in Dewey and Kolb
- Three-register system (Practice / Craft / Theory) for layered reading across student and educator audiences
- Code Bank: pre-shaped scaffolds students tune before they write, with exposed parameters for exploration

SELECTED PROJECTS

Blackout | Solo Developer | Unity, FMOD

- Sightless 2D platformer built around auditory navigation with no visual cues
- Published research whitepaper on designing for blind play
- Directly engages software and disability as a design question, not a compliance checkbox

Prototype Studio Gallery | 11 Weekly Prototypes | Unity

- One prototype per week, each exploring a different question through code
- Text adventures, physics toys, 3D environments, naval strategy, emotional vignettes

Cold Flame | Solo Developer | Unity

- Autobiographical physics game about life, loss, and chopping wood; code as personal expression

TEGE - The Enjin Game Engine | Solo Developer | C++20, Vulkan

- Aesthetic-first open source game engine with a complete editor, 70+ ECS components, and AngelScript scripting
- Built a comprehensive accessibility suite: 8 colorblind modes, screen reader support, switch access, dyslexia mode
- Licensed BSL 1.1 with full documentation and installer

EDUCATION

NYU (Tisch) - MFA, Game Design (Game Center) | 2024 - 2026

Cal Poly Pomona - BS, Computer Science | 2021 - 2023

Mt. San Antonio College - AA/AS, Database Management & Programming | 2018 - 2021

Musicians Institute - AA, Piano Tech (Audio Engineering emphasis) | 2009 - 2011
